NEW MEMBERS

If you are a new customer signing up for residential service, you may choose one of three rates. Generally, homes without electric heat will not benefit from the electric heat rates and the residential rate may be the best option.

RESIDENTIAL RATE

This is the most common rate for residential consumers. The cost per kilowatt-hour is 7.14¢ for the first 800 kilowatt hours. After the first 800 kWh, the rate drops to 5.5¢ per kWh.

RESIDENTIAL RATE (R)	
Energy Delivery Fee	\$16 per meter per month
1-800 kWh	7.14¢ per kWh
800+ kWh	5.5¢ per kWh

METERED ELECTRIC HEAT RATE (H-1)

The metered heat rate requires installation of a sub-meter that reads your exact heating and cooling usage. All heating/cooling usage is 5.5¢/kWh. For all non-heating/cooling usage, the per-kilowatt-hour cost is the same as the

METERED ELECTRIC HEAT RATE (H-1)	
Energy Delivery Fee	\$16 per meter per month
1-800 kWh	7.14¢ per kWh
800+ kWh	5.5¢ per kWh
Sub-meter	\$5 per meter per month
All heating/cooling usage	5.5¢ per kWh

Before installing a sub-meter, please call for a cost/benefit analysis to see if this rate will truly benefit you.

UNMETERED HEAT RATE (H-2)

This rate is similar to the Residential Rate, but the Residential Rate (R) is not all electric and the Unmetered

Heat Rate (H2) is all electric.

UNMETERED HEAT RATE (H-2) *all electric

Energy Delivery Fee	\$16 per meter per month
1-800 kWh	7.14¢ per kWh
800+ kWh	5.5¢ per kWh

GENERAL SERVICE RATE

Single-phase and three-phase small commercial, or up to 15hp irrigation.

GENERAL SERVICE RATE	
Energy Delivery Fee	\$20 per meter per month
1-2500 kWh	7.14¢ per kWh
2,500+ kWh	6.6¢ per kWh
